Profile Summary

- Frontend React Developer with 4+ years of experience building scalable web applications using React.js, Redux Toolkit, and modern JavaScript (ES6+).
- Proficient in developing responsive, high-performance UIs with Tailwind CSS, and Bootstrap.
- Experienced in implementing robust state management solutions using Redux Toolkit and Context API.
- Expertise in optimizing application performance through lazy loading, code splitting, and memoization techniques (React.memo, useCallback/useMemo).
- Skilled in RESTful API integration, JWT authentication, and comprehensive error handling using Axios.
- Strong knowledge of Agile Scrum methodology, code reviews, and mentoring junior developers.
- Hands-on experience with testing tools like Jest and React Testing Library for unit and integration testing.
- Proficient in version control using Git, GitHub, and GitLab, with experience in CI/CD pipelines using Jenkins.
- Experience in deploying applications on AWS (EC2, S3, CloudFront) and modern platforms like Netlify and Vercel.
- Effective in working as an individual contributor and collaboratively in cross-functional teams.
- Ability to learn new technologies and tools quickly to deliver user-focused solutions.

Professional Summary

- Experienced as Process Executive – Data in Cognizant Technology Solutions, Nov 2021 – Jun 2024.
- Currently working as React Developer in Sysres Technologies Private Limited, since July 2024.

Skill Summary

Frontend Core:	React.js, Redux Toolkit, React Hooks, React Router, JavaScript (ES6+), HTML5, CSS3
Styling & UI:	Tailwind CSS, Bootstrap, Responsive Web Design
Performance:	Lazy Loading, Code Splitting, React.memo, useCallback/useMemo, Bundle Optimization
State Management:	Redux Toolkit, Context API
API Integration:	RESTful APIs, Axios, Fetch API, JWT Authentication, OAuth, Error Handling
Testing Tools:	Chrome DevTools, Postman
Version Control:	Git, GitHub
Build Tools:	npm, yarn, Webpack, Vite, ESLint, Prettier
DevOps & Cloud:	AWS (EC2, S3, CloudFront), Jenkins, CI/CD, Netlify, Vercel
Backend Basics:	Node.js, Express.js, MongoDB, REST API Design
Methodologies:	Agile/Scrum, JIRA, SDLC

Project Profile

Project 1: **Cigna Customer Facing Application** **Role:** React Developer
Tools and Technologies: React.js, Redux Toolkit, Tailwind CSS, REST APIs, Axios, Jest, Jenkins, AWS EC2
Period: July 2024 – Present

Project Description: Cigna Customer Portal is a real-time web application enabling policyholders to appeal claims, print insurance cards, and update personal information. Built with React.js and Redux Toolkit, the application provides a seamless user experience with dynamic forms, real-time validation, and secure API integration.

- Architected scalable React.js applications using Redux Toolkit, creating reusable component libraries that accelerated development.
- Implemented responsive UI components with Tailwind CSS, ensuring optimal viewing across all devices.
- Integrated RESTful APIs with JWT authentication using Axios interceptors for centralized error handling.
- Optimized performance through lazy loading, route-based code splitting, and React.memo, reducing initial load time by 35%.
- Deployed application on AWS EC2 via automated Jenkins CI/CD pipeline with zero-downtime releases.
- Conducted unit testing using Jest and React Testing Library, maintaining 85%+ code coverage.

Project 2: **Claims GUI (Internal Enterprise Tool)** **Role:** Frontend Developer

Tools and Technologies: React.js, Bootstrap, REST APIs, MongoDB, JWT, AWS EC2

Period: Nov 2021 – Jun 2024

Project Description: Claims GUI is a high-volume internal tool designed to streamline claim processing workflows. The application handles 1000+ daily transactions with intuitive UI/UX design, enabling agents to manage claims efficiently.

- Designed and deployed claims processing application using React.js and Bootstrap, streamlining workflows for 1000+ daily transactions.
- Developed Role-Based Access Control (RBAC) system with Admin, Manager, and Agent roles using JWT authentication.
- Implemented real-time form validation using custom React hooks, reducing manual data entry errors by 40%.
- Built 15+ reusable components for claims submission, status tracking, and history viewing following atomic design methodology.
- Optimized MongoDB queries and implemented efficient data fetching strategies, enhancing data retrieval speed.
- Deployed applications on AWS EC2 across development, staging, and production environments.

Education

Master of Computer Applications (MCA)	2019 – 2021
RVS College of Arts and Science, Coimbatore	CGPA: 8.5/10

Bachelor of Information Technology (B.Sc)	2016 – 2019
Bharathiar University, Coimbatore	CGPA: 6.5/10

Additional Information

Languages:	English, Tamil
Availability:	Immediate
Work Authorization:	Indian Citizen
